SUMMARY

Back-end developer (Java/Spring Boot) and Science and Technology student at UNIFESP. Built and led a full-stack mobile app from the ground up, covering architecture, back-end, and database. Looking for an internship to keep working on real projects and grow as a developer.

SKILLS

Languages: Java, TypeScript, JavaScript, Python

Back-end: Spring Boot, Node.js (Express), REST APIs, JWT

Front-end: React, React Native

Databases: MySQL, MongoDB

Tools: Git, GitHub, Maven

PROJECTS

JacacultMap — Cultural Access Platform (Capstone Project, IFSP)

- Led development of a mobile app that maps cultural venues and events in Jacareí, expanding access to local culture.
- Designed the back-end architecture and database, and implemented JWT-based authentication.
- Presented the project at JECET, an academic showcase, in 2025.
- Built with React Native (Expo), TypeScript, Node.js/Express, and MongoDB Atlas.
