Objective and About Me

Student of Science and Technology, focusing on Computer Science and holding a Technical Degree in IT. Back-end focused developer with Full-stack experience. I have a strong analytical foundation developed over 5 years of practical and independent experience analyzing financial assets (crypto assets). I am seeking my first internship and/or opportunity in the development field, focusing on learning and technical growth to contribute to real projects.

Technical Skills

Back-end: Node.js (Express), Java, REST API development.

Front-end / Mobile: React Native, TypeScript, JavaScript, HTML5 and CSS3.

Databases: MySQL and MongoDB.

Tools: Git, GitHub and Excel.

Additional languages: Python.

Academic Background

Integrated High School with IT Technical Degree

Federal Institute of São Paulo (IFSP) - Jacareí Campus

February/2023 - December/2025

Bachelor of Science and Technology

Federal University of São Paulo (UNIFESP) - São José dos Campos Campus

March/2026 - December/2028

Projects

JacacultMap - Cultural Expansion Platform (Senior Project - IFSP)

- * Served as lead programmer and team leader in developing a mobile application focused on mapping and expanding cultural access in the city of Jacareí.

- * Responsible for code architecture, project management, and Back-end/Database structuring, handling practical challenges of authentication and scalable architecture.

- * Project presented and highlighted at the JECET academic exhibition (2025).

- * *Technologies used:* React Native (Expo), TypeScript, JavaScript, Node.js (Express), and MongoDB Atlas.

Languages and Courses

English: Independent Level (B1 - CEFR) - Elmo School (2022-2024).

Portuguese: Native.
